## SUMMARY

---

I'm currently a Computer Science student at Arizona State University. My objective is to acquire a steady, challenging position that will provide me with a great work opportunity and further my understanding of Software Development while learning how to function in a professional development environment.

## SKILLS

---

### Languages

- Proficient in: Java, Python, Objective-C, Swift, Javascript, HTML, CSS
- Familiar with: Classic ASP, C#, C/C++, PHP

### Principles

- Proficient in: Language syntax, semantics, control flow mechanisms, Object-Oriented Programming design and implementation
- Familiar with: Algorithm Analysis, Abstract Data Types, Data structures

## PROJECTS

---

### Median (Personal)

- Building, designing and maintaining an iOS application. Learning iOS frameworks and getting familiar with reading official documentation for frameworks.
- Allows user to keep track of weighted/unweighted class grades
- Objective-C/Swift

### Website (Personal)

- Learning the basics of web development. Building, designing, and maintaining a personal site to host program projects
- HTML/CSS/Javascript/PHP

## EXPERIENCE

---

### Web Developer

December 2014 - Present

### Wise Agent

- Primary responsibilities include adding new features, fixing bugs, and communicating within a professional development environment
- Learned time management, responsibility, and teamwork.

## EDUCATION

---

### Arizona State University

August 2012 - Present

Mesa, AZ

- *Bachelors of Science. Computer Science*

4.0 GPA
